

CURODONT™ REPAIR FLUORIDE PLUS

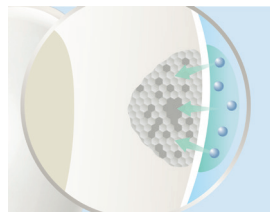

Biomimetic system for Guided Enamel Remineralization of early caries

- Diffuses throughout the lesion, providing targeted remineralization
- Works on all surfaces: buccal, interproximal, occlusal
- Non-invasive
- Quick & easy to apply
- Non-staining & tasteless
- Suitable for all patients, including children
- Safe-to-use

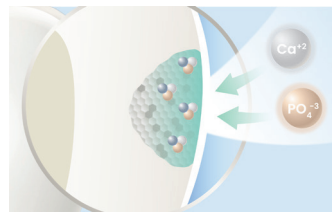

HOW IT WORKS: GUIDED ENAMEL REMINERALIZATION

Targeted application of CURODONT™ REPAIR FLUORIDE PLUS.

The proprietary formulation **diffuses throughout the lesion** due to capillarity.

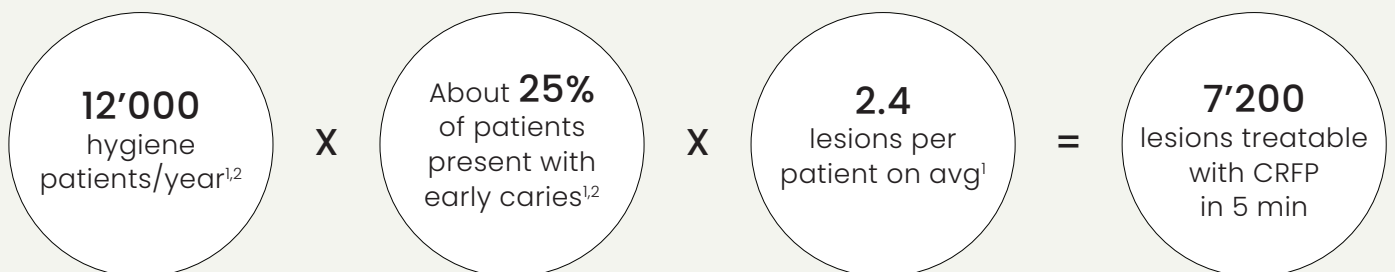

The remineralizing agent, fluoride, together with calcium & phosphate ions from the saliva **starts remineralizing** the lesion.

Over time, the **progression of caries is arrested**, the **lesion is remineralized** and the natural tooth structure is preserved.

PREVALENCE & POTENTIAL TREATMENTS

1. Based on the top 30% high performing practices across 1400 practices.

2. Based on data across 1400 practices
